BotXO

Front-end developer job position

About the Role

This role will be primarily focused on the front-end with our modern stack (NodeJS, React, Redux, Enzyme). You will also be expected to work on some of our API's in a full stack capacity as well. If you want to be a part of an engineering team that cares a lot about each other, our team's culture, our code base, and building a successful company, we'd love to hear from you. Here is our website: http://www.botxo.co/

Responsibilities

- Own the front-end development for our existing BotXO web app to build a excellent user experience that our customers love to use and manage their bots on a regular basis.
- Write reusable, scalable web components using ES6 JavaScript and React/Redux, Sass, and semantic HTML.
- Participate in an engineering team that performs thorough code reviews and frequent deploys that are well tested. GitLab continuous deployment tools.
- Work in an Agile Scrum environment.
- Strong communication and collaboration with your fellow engineers and other cross functional partners.
- Comfortable with diving into projects that may involve some Python or Node.js/Express
- Open to mentoring, pairing, and teaching other junior engineers on the team in addition to learning from more senior engineers.
- Help improve our engineering processes and culture.

Requirements

- Bachelor's Degree in Engineering, Computer Science or a related field preferred.
- 3+ years of experience building web applications and services, preferably in the consumer space.
- Motivated to work in a fast-paced start-up environment while embracing uncertainty.
- Expertise with JavaScript, HTML 5, and CSS 3.
- Detailed knowledge of at least one Single Page Application (SPA) framework (React/Flux/Redux, Angular, Ember, or Backbone).
- Experience with responsive design and flex box.
- Believer in testing, especially unit tests and automated solutions. Knowledge of Enzyme and experience with Sentry will be much appreciated.
- Knowledge of front-end performance optimization.

- Knowledge of Aiohttp, Django, Django REST framework .
- Knowledge of RESTful APIs.
- Knowledge of modern front-end build pipelines and tools. GitLab.
- AWS, Docker, Elastic Search, Elastic beanstalk.

Desirable

- Some back end development knowledge(Basic) on Python
- Experience with tools such as NPM, Webpack, Babel, …

Practicalities

- Office Location: Monte Rozas (Las Rozas de Madrid) and Copenhagen (Denmark)
- Possibility of traveling to Denmark for training and other business activities.
- € 30+K yearly package. Competitive salary dependent on seniority.
