AIS Software

AIS Software is a professional software house that is dedicated to developing, implementing and supporting systems and projects for various markets using the very latest technologies. In our daily work we use the cutting-edge tools and we have a passion for clean and maintainable code. Our primary focus is the development of intuitive software solutions. We are seeking to strengthen our team by recruiting the following person:

.NET Software Developer

What you will be doing:

- Design, development and implementing software for a variety of applications
- Developing and maintaining the software framework and services using the .NET framework and Microsoft technologies
- Delivering innovative, flexible, integrated solutions to meet customer's changing business.
- Participating in agile development.
- Researching and answering technical questions.

You should be studying or have some experience of:

- Visual Studio 2010 or higher.
- .NET framework, including Visual Studio, ASP.NET
- Development experience utilizing C#, HTML, SQL, LINQ
- Working knowledge of Microsoft SQL Server, T-SQL, and Stored Procedures
- Experience working in an Agile development environment would be considered an asset.

Applications including a C.V should be submitted immediately to:
The HR Manager, AIS Software on e-mail: vacancy@ais.com.mt
