

Junior Business and Technical Consultant

Help us to shape the future

The Avaloq group is the international reference for integrated and comprehensive banking solutions for retail, wealth management and universal banks. Avaloq's products are in use in the most demanding financial centres. 1400 highly qualified banking and IT specialists develop and operate banking technologies that are fully integrated from front and middle to back office. Avaloq has a customer base of over 100 banks which put their faith in the company's solutions. The company, headquartered in Zurich, has subsidiaries in Berlin, Frankfurt, Geneva, Leipzig, London, Luxembourg, Paris, Vienna, Hong Kong, Singapore and Sydney. It has two development centres, one in Zurich and one in Edinburgh, as well as a development support centre in Manila. Avaloq provides leading business process and IT outsourcing solutions in Switzerland and in Germany.

In our division Consulting & Solution Integration we provide the interface between our customers and the Avaloq product development. In customer projects we work together as a team. We advise our customers according to the Avaloq best practices to solve IT challenges and to implement new functionalities. We are constantly moving on the pulse of new markets.

Job Description

As a Junior IT-Consultant you will:

- Together with our experienced consultants you will work closely with our customers and partners in analysing customer requirements and designing and parameterizing solutions to them.
- Help our clients to adapt the Avaloq Banking Suite to their needs and to improve their processes.

You will be part of a fast growing and international team with strong engineering and banking skills which offers a unique learning environment and excellent career opportunities.

Your responsibilities

- Build up detailed knowledge about our Avaloq Banking Suite and how to customise it
- Analyse and structure business requirements together with our clients
- Design business and technical solutions in close collaboration with the banks
- Implement these solutions using our parameterisation tools
- Support our sales team to win new customers
- Contribute to the continuous product improvement process

Education

- University degree; preferably in Computer Sciences or business
- Knowledge of at least one programming language

Professional Experience

- Hands-on experience in software engineering
- Knowledge in banking / finance industries and their processes is an asset
- Experience in either Avaloq Banking System or with another core banking systems is a plus

Personal Requirements

- Enthusiasm for complex bank-specific problems and designing technical solutions
- Profound interest in Financial Services, IT and banking
- Professionalism in dealing with customers and good communication skills
- Strong analytical and conceptual skills and high standards of quality
- Reliable, efficient in working under pressure
- Passion for learning and always improving yourself and the team around you
- Good team player
- Ability to adapt easily to a diverse, multi-cultural environment
- Willingness to work on international assignments (travel)
- English is a must (German or French is an asset)

Main place of work

Madrid
