Job Description

You will be part of a dynamic team of Software Developers and Business Analysts located in Zurich, Madrid and Manila. During your daily work, you will come into contact with and get to know all aspects of the Financial business. Your contact with industry experts, external partners and customers will constantly challenge you to improve your knowledge of the software you create and the business, which it covers.

Together with our Business Analysts and Architects, you will develop new functionality and enhance existing features. Besides, you will also have the opportunity to support development in interdisciplinary innovation projects.

The Avaloq Banking Suite is primarily programmed in PL/SQL and our own script language, Avaloq Script. The development takes place in our integrated development environment, which is a strongly customized Eclipse platform. Within this development environment, we follow standardized and industrialized processes starting from specification, through development and ending with packaging and deployment of the software.

Your responsibilities

- Implementation of new functionalities
- Close collaboration with the business analysis and architecture for specifications and design
- Extension of the standard customisation for Avaloq Core
- Maintenance of existing functionalities
- Development of automated tests.
- Update of technical documentation in close collaboration with Business Analysts and Technical Writers

Technical support of customer projects (new implementation of, or upgrades to, the Avaloq Banking Suite)

Education

- University degree; preferably in Computer Sciences or business
- Knowledge of at least one programming language

Personal Requirements

- Solid knowledge of software engineering
- Profound understanding of object-oriented software design
- Strong analytical and problem-solving skills
- Knowledge of relational database systems (Oracle, PL/SQL) is a strong benefit
- Experience in development of complex applications is an advantage
- Open minded and team oriented
- Eager to learn and take on new challenges
- Interested in the banking business
- English is a must (German or French is an asset)

Main place of work

Madrid

Do you want to work in a dynamic, professional environment? This position offers interesting responsibilities, the opportunity to work as part of a highly qualified team, a high degree of independence in your work, career progression opportunities and excellent earnings potential.

We look forward to receiving your application **in English**, via e-mail to
