Engineering Platforms and Services - Software development (server & mobile)

Position Title

C# Software Engineer - M/F

Position Type

Professional

General Description

At Gemalto, we bring trust to an increasingly connected digital world. **Gemalto is the world leader in digital security** with annual revenues in 2015 of €3.1 billion and more than 14,000 employees of 117 nationalities operating out of 118 offices and 27 R&D centers, located in 49 countries.

In the public sector, Gemalto provides secure documents, robust identity solutions and services for governments, national printers and integrators in the service of citizens. Its products and solutions are deployed in more than 100 government programs worldwide.

We are now seeking a **C# Software Engineer** to join our Software Engineering group Government Programs team in Madrid. You will help public services go digital and mobile. You will be the responsible for the design, implementation and integration of software and hardware components to match the needs of Gemalto's worldwide customer portfolio for ePassports, ID-cards, healthcare documents and citizen biometric registration systems. Develop and validate the application set such as eDriving Licences and ICAO compliant applications, biometric match on Cards, IAS, PKIs and other government program applications.

A week in the life of

A C# Software Engineer

- You will participate in the **design, implementation, security and validation** of applications within a project team structure, in accordance with institutionalized processes and delivery standards.
- You will **analyze customer requirements, perform feasibility study, provide technical proposal**, and contribute to project specifications requirements.
- You will **produce all the documentation** related to these activities.
- You will follow-up the delivered project during warranty and support phase (**Support Level 3**).
- You will be involved in **pre-sales activities**, like technical assistance to sales team, giving technical workshops to customers.

Knowledge, Skills and Experience

- To succeed in this job, you will have at least **5 to 6 years' experience in SW Development** / Senior level of experience with large-scale software engineering. At least 3 years' experience developing desktop application with C#.
- You must have excellent knowledge of C#, .NET platform and related technologies (WPF, WCF, XAML).
- Experience with Object Oriented C# libraries, Web services clients (SOAP/Rest), WCF, WPF.
- We are looking for someone who is detailed oriented has a very good analytical mind.
- You must be willing to travel worldwide for workshops, integration and deployment in customer premises (short/medium duration).
- You must be fluent English.

- You must have Bachelor's degree in a technology-related discipline, preferably computer science or engineering.

We offer

- **Full-time, permanent contract in a unique, growing B2B tech organization**
- Dynamic and multidisciplinary professional environment
- Career Development
- Competitive salary with attractive benefits package
- Flexible working hours
